

09 September 2010

**Congratulations Gimnazjum im. Feliksa Szofdrskiego!**

Your school has been selected to be a Pathfinder School as part of the Microsoft Partners in Learning Innovative Schools Program! With your school's selection, you join an elite community of innovative schools from around the globe.

The Worldwide Innovative Schools Program team of evaluators, which includes members of our International Advisory Council, Partners in Learning Regional Managers and Microsoft staff, started by reviewing 114 applications from 48 countries, finally selecting 56 of the top institutions for participation in the Pathfinder School Program. Congratulations on making it through this highly selective process.

The success of each participating school is critically important to helping drive system wide change through the Innovative Schools Program. We are excited to work with you and your school to achieve your goals as you lead your institution through change. Based on your application responses, you have demonstrated strong school leadership with a proven record of innovation and successful change implementation. Additionally, you have a vision for learning and have already started on the road to reform and improvement. Microsoft is honored to work with you on the next steps of this change process, and we appreciate your commitment to continuing this journey with us.

Sincerely,

Kati Tuurala  
Partners in Learning Innovative Schools Program Manager
